

Bridgewood Wall

The Look and Feel of Wood in a Concrete Wall

Our new Bridgewood Wall is the latest addition to the Bridgewood family, which includes the Bridgewood Slab and Bridgewood Step.

Each piece features a realistic wood texture on each face taken from actual pieces of wood plank. Unlike traditional wood surfaces, Bridgewood Wall will never rot, warp, splinter or fade. It'll never need to be stained or sealed like wood, or crack like stamped concrete.

This product is perfect for freestanding walls, small planter boxes and garden walls.

Garden Walls
