

Notes:

1. Section shown are the minimum recommendations for pedestrian loading.
2. Projects with heavier traffic or sites with poor soil conditions may require thicker gravel base, concrete curb edge restraint, and/or sand subbase.
3. Provide adequate surface drainage to prevent ponded water.
4. Slabs shown schematically - plan dimensions vary between product.

This drawing is for reference only. Determination of the suitability and/or manner of use of any details contained in this document is the sole responsibility of the design engineer of record. Final project designs, including all construction details, shall be prepared by a licensed professional engineer using the actual conditions of the proposed site.
