

Hatch Pattern File Import Instructions

65BrdP2.pat

- In order to use the .pat hatch patterns, they need to be placed in the AutoCAD SUPPORT directory on each user's local drive. The path may look something like this:
 - USER\APPDATA\ROAMING\AUTODESK\AUTOCAD 2011\R18.1\ENU\SUPPORT or
 - C:\PROGRAM FILES\AUTODESK\AUTOCAD 2011\USERDATA\CACHE\SUPPORT
- The patterns can then be selected from the hatch library within AutoCAD.
- Please note the file naming convention. In the example given, the file represents **65mm Broadway, Pattern type 2**.
- These patterns are Metric in scale, to use this in an Imperial scale drawing, use a scale of 0.03937 to get the correct scale of the Hatch Patterns.
